

AV G.R.E.E.N Center

What is it?

Our acronym stands for:

Auroville Green Resource and Environmental Education Networking Center.

Our mission is to inspire and empower individuals and collectives to integrate new and existing green, sustainable initiatives into daily life in Auroville, its bio-region and beyond, through networking, education and action.

Our vision is a global society that experiences the inter-connectedness of life, which inspires informed choices leading to an enriched, sustainable environment and a socially just community expressing an actual human unity and living in harmony with nature.

Inspired? Get Involved!

- ◆ We are looking for folks who are inspired by this project to volunteer time and energy...
- ◆ We are functioning as a series of small teams (circles), working on each of our different projects.
- ◆ The core team consists of one or two people from each of the circles.
 - ◆ We welcome Aurovilians, Newcomers and Guests to participate in big or small ways, as you like...
 - ◆ Please email us at: avgreencenter@auroville.org.in

We have a 3-fold focus:

1) Networking

To create a strong network of shared information, resources and collaboration between the various groups and initiatives in Auroville, the bio-region and globally who are currently working on environmental and sustainable initiatives.

2) Education

To increase awareness, understanding and involvement between green workers and the Auroville community on green work* and farming in Auroville.

(* By 'green work', we mean any and all work that has, as one of its primary concerns, the well-being and sustainability of the environment in which we live.)

To create additional school programs to educate children about the current environmental issues and possible solutions.....and to involve them in considering the effects of their actions on the environment. Also, to encourage them to participate in activities that will make a difference (eg: regular 'clean-up' days)

3) Action

To inspire, host and support actions to address the current environmental issues positively and effectively in Auroville and the bio-region.

Why Are We Fundraising?

We were very grateful to receive an initial grant of Rs 40,000 from Stichting de Zaaier. That money was earmarked for getting the new Auroville Market up and running. Most of it is now used up. Please email us for a copy of our expenses so far, if you wish to see where the money has gone and our projected expenses.

We are now actively fundraising to generate support for each of our current and proposed projects. If you would like to support this work, please make a contribution to the AV GREEN Center (P.T Acc # 251238) either on the P.T. sheet here or by transfer at Financial Service.

THANK YOU FOR YOUR SUPPORT!
