Mother looks weary. She is holding her palms on her eyes.

... They stupefy me with material, mechanical things to be done, and as they're all in a hurry and disorganized, they come at the last minute and the thing has to be done "immediately". All this to explain to you that I am completely stupefied. If you like, we can do some translation, because then it's you who's working, not me! But do you have anything to say? ... If you do, tell me. Oh, there are always things to be said, but...Ah! Tell me, then.

They're personal things. Yes, fine, tell me.

I don't quite understand my position now. I have the feeling that my existence has grown thin, thin, thinner and thinner - it has thinned down to almost nothing. Oh, very good! Except for mechanisms, there's nothing. It's good, it's a very good sign, it means you are becoming free from your ego.

But if at least, in this nullity, there were experiences...

Listen, yesterday or the day before (anyway after I saw you last time), for a whole day I had exactly the sensation you've just told me. I suddenly remembered sensations or impressions or experiences I had when I was here or there, in France, in Japan, and I had that impression... yes, of a thinning down, a shrinking to the point of nonexistence. Yes, exactly. Absolutely nonexistence. And I wondered, "But where is that person I used to call 'me'?... Where is she, what is she doing?" - It had evaporated (Mother blows air between her fingers), absolutely evaporated. Oh, how I laughed, mon petit, how delighted I was! For half an hour I laughed within. I said to myself, "Well, it's a success!" Then I looked at that poor body and thought, "If this too could be changed into something else, it would be magnificent!" (Looking at Satprem out of the corner of her eyes) It's very good - it's very good, it's a sure sign that one has emerged from one's ego. Yes, but in that nonexistence, only things without any interest remain: the body, the mechanisms. Because that's what remains. But what to do? ... I tell you, the impression was that there only remained what directly concerns this. Well, yes! In other words, nothing; it's almost nil. So the problem arose: "How can THIS change?"

Of course, I had the answer.... I have a calendar with quotations from Sri Aurobindo, and I had the answer in the evening. I don't remember the exact words, but he said, "The Spirit will change this human body too into a divine reality." That was the answer; he said, THE SPIRIT. I said to myself, "Obviously, but how can THIS be transformed? ..." That's the problem. And the answer is always the same: it CANNOT depend on our effort. Naturally, it goes without saying that we must make ourselves as plastic and well-disposed as possible (I am speaking of the body), but the change CANNOT depend on it, it doesn't have the knowledge and it doesn't have the power; therefore, the change can only depend on the divine Will. That's exactly it. This has been the experience of the past few days.

But you get a feeling that even aspiration ... I can't say it disappears in that nonexistence, but there's nothing, there's almost nothing left. Mon petit, that's because what you call "aspiration" is a movement of your psychic consciousness, mentally formulated and supported by the vital - but it ISN'T YOUR BODY. And it's only if you are very attentive to the vibration of the cells, if you are accustomed to observing them and feeling them that you can see. Well, I don't know, but I can't complain about my body's cells.... You know, it isn't a perception, it isn't a sensation, it is ... a LIVED FAITH in the existence of the Supreme alone - you know, a faith that it's the only Reality and the only Existence. Just that, and everything seems to swell up, as if all these cells were swelling up with such joy! ... Only, it doesn't take the form of a feeling, not even of a sensation, even less of a thought; so if you aren't very attentive, you don't notice it. But, for instance, when I repeat the mantra, it's repeated by that famous physical mind, which is so stupid (the mantra is the only thing that can keep a rein on it), and now it has become so identified that the mantra is its whole life, it is like a pulsation of its being; but then when I come to the invocation (there is a series of invocations: each one has its own effect on the body), when I come to "Manifest Your Love," I see a sort of twinkling of a golden light, which represents an intense joy in all the cells. It isn't easy to observe, you must be very, very, very detached from the movement of thought, otherwise you don't notice it. But if you see it, you see that even those cells are there waiting for the Thing.

I don't think that much more can be expected of them, except, perhaps, to get rid little by little of wrong habits and false vibrations (which, naturally, are the cause of what we call "illnesses").

Announcement from the BCC
Dear Community;
It is end of March, end of another financial year. BCC this year has been conducting a more thorough (zero-based) budget review. The budget submission deadline was October 2018 but we have been receiving budget as late as last week. Hence the entire review process is rather delayed. The entire team is engaged in reviewing both recurring, non-recurring budgets and maintenance. At this stage, until the review is completed, it will not be possible to attend to any requests for maintenance from individuals or activities.

Thank you for your patience and understanding.
Sincerely, BCC (Anne, Claudine, Enrica, Hari, Hendrik, Jean-Yves, Jyotiprem, Rathinam, and Hans)

About the land Board Selection Committee
As you are aware, three members of the Land Board have resigned in June 2018. Since then the Land Board team functions without full membership and the replacement of the three resigned members is yet to be done.

The Land Board mandate states in its article 1.1: “The Residents’ Assembly shall constitute a Land Board whose members shall be appointed directly by the Residents’ Assembly or by a committee constituted by it for the purpose.”

As per the above mandate and in order to speed up the selection process, it was agreed to use the previous Land Board Selection Committee to fulfill the task. Due to unavailability of a few previous members (Min, Navroz, Divya Kapoor), there will be a slight modification in the membership.

The Land Board Selection Committee will consist of
- Daniele (FAMC),
- Divya Lieser (Community at large),
- Judith (Community at large),
- Mita Dogupta (AVC),
- Ranjith (Working Committee),
- Sacha (Community at large),
- Srimoyo (TDC).

The above-mentioned Land Board Selection Committee will try to identify people in the community with the required skill to serve in the Land Board, especially in areas of negotiation, communication and administration, by invitation and conducting interviews with them.

Members of the community who are interested in this work may also express their interest by writing to the land board selection committee at lbselection@auroville.org.in before 14.04.2019.

The three newly selected members’ names will be published to the community for feedback and the feedback will be reviewed by the Auroville Council, the FAMC, the Land Board Selection Committee and the Working Committee.

The final outcome will be announced to the community by the Auroville Council and the Working Committee after due process of the received feedback, along with a complete report on how the process unfolded.

Sincerely,
The Auroville Council, the Fund & Assets Management Committee, the TDC and the Working Committee.

Call for Grant Proposals - SDZ Funding in 2019
The Project Coordination Group (PCG) will be meeting to review grant proposals for funding by Stichting De Zaaiër in 2019. All documents related to this purpose are to be submitted in the prescribed forms as attachments emailed to pcg@auroville.org.in, latest by 30 April 2019. (In case your proposal is not ready by this time, two more calls for proposals for SDZ will be announced later this year, corresponding to the dates of meetings during which the SDZ board will consider proposals from Auroville for possible funding.)

With regard to Stichting De Zaaiër, the Project Coordination Group will check whether proposals fall within their funding criteria and forward those that do to the SDZ Board for final selection and grant allocation.

Stichting De Zaaiër welcomes project proposals for:
- research studies in the fields of sociology, economy, psychology and inner development;
- exploratory (research) studies into the relations with the world outside Auroville, in particular with the villages (and villagers) surrounding Auroville, as well as proposals for initiatives that seek to contribute to strengthening these relations;
- initiatives that seek to enhance efficient co-operation of Aurovilians with the aim of making full use of the existing potential in Auroville;
- studies exploring a sustainable future for Auroville and initiatives contributing to such a future;
- initiatives requiring seed money for innovative, out-of-the-box proposals, informal education and training, women’s empowerment, outreach and proposals prepared by youth;

Please note that no funds are available for infrastructure, buildings or transport. Requests for equipment will only be considered if specifically required for the implementation of the project and are not already available in Auroville.

Stichting De Zaaiër has also indicated a preference for the funding of projects and activities for which the maintenance of Aurovilians is either covered by Auroville or from a source other than SDZ grants.

A revised grant application form, budget request form and guide for filling these in are available on request from pcg@auroville.org.in or may be downloaded from Auronet.

Please note that if you are submitting a project that has anything to do with Auroville or Auroville Outreach schools, or, students of any individual classes, your project is to be reviewed by all concerned School Boards prior to the Project Coordination Group review. (Please contact all individual schools before submitting your proposal to the School Boards.)

Therefore, it is important that all the relevant bodies (i.e. schools, teachers, school boards, etc.) are aware of your project and support it. In this way, the Project Coordination Group can more easily recommend a project for funding knowing it will have the support of schools and thereby have a greater impact on the beneficiaries of the project.

NB: If you have already received funding for a project through the Project Coordination Group please send in a progress report/status update (if project is ongoing) or final report (if project has been completed or all funds have been utilized) before making an application for new grant.

For more information or assistance, please write to pcg@auroville.org.in or contact the Project Coordination Group at the ACUR (Town Hall) by phoning 2622250.

Last date for submitting proposals for possible funding for this call is Tuesday, 30 April 2019.

FOR YOUR INFORMATION

On proper holding of pets

Dear Community, presently the Council is at the receiving end of a lot of mails related to complaints regarding dogs in various communities. We request you to first try to resolve it within the community. If it is a difficult conflict to resolve within the community, then please approach Koodam and only thereafter if your issue is still unresolved contact the Council. For sterilization and vaccination, please contact at helpanimals@auroville.org.in.

We would also like to bring to the awareness of the community a conversation with The Mother regarding pets in Auroville in the link below:

https://docs.google.com/document/d/1Q8x4ieKXE0tvzrsA7ofZrtrVyVd0A8EioJQGbfBhuQ/edit

Having said this and the fact that Aurovilians do have pets, we would like to share an extract from the guidelines (which are in process presently) on Responsible Pet Ownership with the community. The guidelines too will be shared soon.

When it comes to dogs, cats and other animals in residential areas, opinion is often sharply divided, between animal lovers and those who consider them a nuisance. Therefore, guidelines agreeable by all seems like the necessity of the day and owning a pet should be taken up only after understanding what the related responsibilities are:

- **Commitment:** When adopting a pet, you should be sure that you would be able to care for it for its entire life. Get a pet only after evaluating the time and energy you can give to its wellbeing and avoid impulsive decisions when selecting a pet. A pet is not a ‘brief entertainment’ either for you or your children, nor is it a status symbol. Average lifespan of a Dog is 10 to 12 years and that of a cat is 10 to 14 years and you’d need to commit to the relationship for its lifetime. Pets are not always perfect, and you should be willing to commit the time, effort and money to also work through any behavioral or health challenges that might arise in its lifetime.

- **Investment:** Pet ownership requires an investment of time and money. You would have to make sure that it receives preventive health care such as yearly vaccinations, regular parasite control, spaying and neutering as well as care for any illness or injuries. When you take into consideration all that is required in terms of food and healthcare, the average cost of keeping a dog or a cat comes easily to 2 to 6 thousand Rs. per month depending on the breed of the pet. The time you’d need to spend with the pet to properly socialize and train it, provide appropriate exercise and mental stimulation, care for it when ill etc. at an average would be between 2 to 3 hours per day.

- **Respect and be respected:** Respect others by preventing your pet from negatively impacting other people, animals and the environment. This includes proper waste disposal, noise control, and not allowing your pet to stray or become wild. Providing your pet with love, food and shelter is not enough to keep it happy. An unexercised pet is an unhappy pet that will roam, be noisy and be a nuisance to others. Providing exercise and mental stimulation appropriate to your pet’s age, breed and health status is an important aspect of keeping it not only in shape, but also happy and the neighbors undisturbed.

Get a pet only if you have the time, energy and finances to properly care for it throughout its lifetime. Hoping that all pet owners will become responsible pet owners in Auroville. Warm regards, The Auroville Council and Helpanimals

OBITUARY

Francesca Ivanov proceeds: This is to inform the community that our sister, Aurovilian Francesca Ivanov, passed away yesterday evening, 24 March in a hospital near her native village, Edolo, in northern Italy. She was 48 years old.

Francesca first arrived in Auroville in 2007, and started her Newcomer process in 2009. She soon started working as receptionist at Kailash Clinic. She loved the job and many of us may remember her always busy, very involved and dedicated. In 2011, a year after officially joining Auroville, she had to return to Italy to look for a job that would provide her with resources to be able to live here. Unfortunately, things did not go well for her and at the end of 2015 she discovered that she had lung cancer.

Francesca never lost hope of returning one day. Auroville was always in her thoughts and words and prayers. Her faith has supported her for all these years without ever making her falter in the certainty of return. Praying that she now may have returned, our warmest condolences go out to her sisters who stood by her till the end.

GREEN MATTERS

Healthy Cashew Network News

Spraying of chemical pesticides on cashew trees is occurring throughout the Auroville area, on fields not owned by Auroville. The cashew spray season continues into April. Harvests begin in April and continue through till June.

Frequently Asked Questions:

Can we use face masks to protect ourselves from the spraying? Where can we get them?

For many toxic chemicals, the respiratory (breathing) system is the quickest and most direct route of entry into the circulatory system. Agrochemical products are diverse in toxicity and duration and there are a variety of masks, respirators and filters recommended to protect against direct exposure. Masks with rechargeable carbon filters which can offer some protection for the chemical sprays are an Auroville product available locally -- www airemasks com -- or you can find many different masks offered online.

What is the medicine recommended when I feel allergy symptoms from the spraying? What is the correct way to use the homeopathic remedy?

A homeopathic remedy for dealing with pesticide effects, Okoumbaka, is recommended for the allergy symptoms exhibited on exposure to the chemicals being sprayed and is available free of charge from the remedy box at Integral Health Centre in Prayatna. Take as needed, or as indicated by your homeopath. Auroville has many homeopathic specialists, e.g., Sigrid, Malar, Peter, and others at the Integral Health Centre, Michael in Santé, et al.

The Tangled Web of Cashew Growing and Pesticide Spraying is a 2-page article in the current Auroville Today, March 2019 issue about the complex story related to cashew farming in the Auroville area. This in-depth article is comprehensive. You can find it here: https://www.auroville.org/content/4630. AV Library has copy for reading in the magazine section. Auroville Today is available in local shops.

Kids Talk Trash: Plastic Patrol

Multi-layered packaging like LAYS chips packets cannot be recycled and it is one of the worst plastics for the environment because it has aluminium on the inside and colourful printed plastic on the outside. We looked at all the chips available in 3 of the main shops in Auroville. Old Pour Tous has 5 different brands and 25 flavours of chips. HER'S has 8 different brands and 28 flavours of chips. New Pour Tous has none. If you like delicious, crunchy, salty chips, eat lunch in Solar Kitchen on Saturdays!

Inspiring role models for the climate

The stories of a 107 year-old woman and a 16 year-old girl.

The Fridays for Future campaign is a student strike for the climate, students took to the streets all over the world on Fridays to campaign for a better future, calling for action to address the imminent threat of climate change. An estimated 1.5 million people traded education for action on Fridays to demand governments for stronger political action on our current climate crisis. In the UK, Australia, India, South Korea, South Africa and the US, students came together with one common purpose, to march for their say on their future and to demand government action. “We proved that it does matter what you do and that no one is too small to make a difference”, wrote 16 year old climate activist and strike leader Greta Thunberg, who also made an inspired speech at the Climate Conference in Katowich Poland. She has since inspired students around the world to make a stand. She is the founder of the Youth Strike for Climate movement and is nominated for the Nobel peace prize.

While many have praised the collective action of the student strikes, some have criticized students for skipping classes, but students say the reason we go to school is that we can create a future. If we don’t add our voices then we’re not going to have a future anyway, so this is more important for us at the moment. Students have the support of over 23,000 scientists from Austria, Germany & Switzerland in a signed statement supporting the Fridays for Future campaign. Following the success of Friday’s protest, plans are underway in other countries for next Friday’s events when youths are expected to demonstrate for a strict climate policy.

And then there is Thimmakka, 107 years old, finding her purpose in life along with her husband. She planted 8000 Banyan trees and nurtured them by walking 4 km daily (after working in the fields) to water them. She is affectionally called Sallumarada Thimmakka (Sallu - in a line and Mara - tree). She and her husband planted banyan trees for the entire 4 km stretch in Karnataka and they took care of them like children. This woman got a Padma Shri from the president which she received barefoot! She is an inspiration and still continues her work even at the age!

Give plants a good mulch

When I stroll around in Auroville, I often see the dry, bare soil under and around trees and other plants. I wonder, is it a deliberate attempt to keep the garden neat and clean? In the case of cashew trees, is it for easier access for harvest?

Inspired by practices of Masanobu Fukuoka (Japanese) in The One-Straw Revolution, and Bhaskar Save (Indian) in The Vision of Natural Farming, I keep the soil well mulched; at the least, I don’t remove what is already covering the soil. The plants are happy, and I don’t need to water them that much.

A great variety of materials can be used as mulch, i.e. in situ composting: Fallen leaves and branches, grass clippings (no seeds, best dried), organic kitchen waste, flowers after use for decoration, newspapers, cardboard, chip wood, hair, saw dust, urine and excrement of humans and animals, etc.

With mulching, there will be fewer weeds, less erosion of soil by wind or rain, less compaction, less evaporation, and less need for watering. Soil aeration is higher, so is moisture absorption and insulation from heat and cold. The mulch also supplies food for earthworms and micro-organisms in the soil to provide nutrient-rich compost for the plants.

With permanent mulching and no tillling after planting, soil fertility gradually returns and improves year by year.

One can take a barefoot walk on the thick carpet of fallen leaves in a forest, and feel the wonder of the Nature doing its work.

Save good clothes at Eco Service

Did you know many clothes and shoes in perfect shape end up at Eco Service? Come and check them anytime and take along those you like or need.

Eco service has bundled clothes in good shape ready to be washed. We invite you to offer a tiny bit of your time to wash them. After that you can give them to your friends, to the free store, sell them at the Sunday farmers market.

The clothing industry is the second most polluting industry after oil extraction. Clothes require a lot of pesticides, water and petrol (for transportation) to be produced. Let us be conscious about the future of our unwanted clothes and make sure they end up in someone else’s hands. Not in the landfill, in our precious earth.

Let’s make Auroville a waste-free place.

Let’s think twice before we throw away our belongings and let them become waste.

Greetings from Waste-free Auroville

Roots April session - Back to “Roots”

In this April session, we are going to Auro Orchard, the oldest and second largest farm in Auroville. Together with the farm and volunteers’ team, we will harvest roots (turmeric, sweet potato, taro, yam, tapioca, maybe elephant foot), veggies (ladies’ fingers, long beans, bottle gourd, cucumber, brinjal, pumpkin, chicken spinach, carrots, sissoo, moringa leaves, rosella leaves, and fruits (papaya, lime, coconut), wild plants and flowers.

We will learn how to use them traditionally, intuitively and creatively, including how to open and grind a coconut, how to cook Tamil food on the occasion of Tamil New Year, and how to prepare veg soup, raw vegan salad, etc.

We will highlight the importance of “roots” in maintaining a grounded, balanced diet. And we will prepare turmeric drink, turmeric pickles, sweet potatoes, etc.

After harvest and cooking, time to have lunch and savor all the abundance in the shade of trees.

NOTES

Oceanography “Amor fati” (Lat.): love to fate.

The life was always flowing in the ocean. All Aurovilians, in some ancient incarnations, lived in the bottom of ocean. I feel a little bit nostalgic about the oceanic life. There are the people with open third eyes, they can see the ancient oceanic Aurovilians. In Aspiration community there was a girl, guest from Mumbai. She created a painting on the kitchen wall: jellyfish and whale. Of course these were ancient oceanic Aurovilians. The ocean has its own music, and I hear same music from the painting.

The scientific oceanography started in 1872. The British corvette HMS Challenger, in that year, was going for studying the world ocean. It spent 3 and half years in travelling around the world. The results were very rich. The industrial revolution started in 1750, but in 1872 there wasn’t strong pollution in the ocean. The scientists are sure that very soon the plastics in ocean will be more than fishes.

There is overfishing in the ocean. People want to receive more and more money, profit from fishing. If fishermen put the nets overfishing in the ocean. People want to receive more and more money, profit from fishing. If fishermen put the nets in the ocean, they catch not only fishes, but many other species of oceanic life: jellyfishes, starfishes, mollusks etc. Some kinds of the oceanic creatures haven’t commercial significance, and fishermen put them in shore – like on Quiet’s beach.

Many creatures in the ocean are very beautiful. One French boy, a guest of Aspiration, created a collection of the shells. There is science about the shells, named conchology. Many people in the world like the beauty of shells and have collections of them. The biodiversity of land is mainly diversity of insects, but in the ocean mollusks are especially numerous and different. There is a miraculous world. For example, the octopuses have the blue “blood”: there is copper in it, but in our blood is iron.

If we can in any yellow submarine fall in the oceanic bottom, we can see that wonderful world. I’m very good understanding an English song: “Mother, oh carry me back to the sea”. Can I incarnate again as a dolphin and play joyfully with the waves?

Bar’s: (Picture: HMS Challenger under sail, 1874 / Source: Wikipedia)

The City of New Dawn woke this morning, on 28.2.2019, to the announcement of a new inclusive exploration...

A peaceful assembly coming from the whole world was present in contemplative silence, listening to the melodious whisper of a ‘fire without smoke’, ‘Agni mule purohitam’, telling us the old story of the world which decides itself the paths justifying our common destinies -

In this untrebling alchemy which doesn’t forget in adversity, that always Her white Force is leaning over us all, orienting, protecting, guiding us, loving us infinitely and eternally.

Auroville Baby is not yet weakened by age, it preserves and creates constantly fresh and strong beings; because here, at Auroville in India, this continent possesses still the original Form of ancient times, we greet it again today, with profound gratitude, as the refuge of our future, where everything is there and will always be there at every instant.

To create in Auroville not varieties of human beings, but a new race.

That’s what we call the new creation marching on....

Our body’s cells must hold the immortal’s flame. Else would the spirit reach alone its source.

Leaving a half-saved world to its dubious fate.

Nature would ever labor unredeemed;

Our earth would ever spin unhelped in space,

And this immense creation’s purpose fail.

Gangalakshmi, House of Mother’s Agenda, Savitri Bhavan

*Everyone is welcome.*
One of the main ways Williams dramatizes fantasy’s inability to overcome reality is through an exploration of the boundary between exterior and interior. The set of the play consists of the two-room Kowalski apartment and the surrounding street. Williams’s use of a flexible set that allows the street to be seen at the same time as the interior of the home expresses the notion that the home is not a defined world that is impermeable to greater reality.

The antagonistic relationship between Blanche and Stanley is a struggle between appearances and reality. It propels the play’s plot forward. Blanche’s fabrications and does everything he can to unravel them. The imaginative world between fantasy and reality is permeable. Blanche adapts the exterior world to fit her delusions. In objective reality is not an antidote to Blanche’s fantasy world; rather, Blanche adapts the exterior world to fit her delusions. The story of STREETCAR: Fantasy’s Inability to Overcome Reality

“Although Williams’s protagonist in A Streetcar Named Desire is the romantic Blanche DuBois, the play is a work of social realism. Blanche explains to Mitch that she fibs because she refuses to accept the hand fate has dealt her. Lying to herself and to others allows her to make life appear as it should be rather than as it is. Stanley, a practical man firmly grounded in the physical world, disdains Blanche’s fabrications and does everything he can to unravel them. The antagonistic relationship between Blanche and Stanley is a struggle between appearances and reality. It propels the play’s plot and creates an overarching tension. Ultimately, Blanche’s attempts to remake her own and Stella’s existences - to rejuvenate her life and to save Stella from a life with Stanley fail. One of the main ways Williams dramatizes fantasy’s inability to overcome reality is through an exploration of the boundary between exterior and interior. The set of the play consists of the two-room Kowalski apartment and the surrounding street. Williams’s use of a flexible set that allows the street to be seen at the same time as the interior of the home expresses the notion that the home is not a domestic sanctuary. The Kowalski’s apartment cannot be a self-defined world that is impermeable to greater reality. The characters leave and enter the apartment throughout the play, often bringing with them the problems they encounter in the larger environment. For example, Blanche refuses to leave her prejudices against the working class behind her at the door. Though reality triumphs over fantasy in A Streetcar Named Desire, Williams suggests that fantasy is an important and useful tool. At the end of the play, Blanche’s retreat into her own private fantasies enables her to partially shield herself from reality’s harsh blows. Blanche’s insanity emerges as she retreats fully into herself, leaving the objective world behind in order to avoid accepting reality. In order to escape fully, however, Blanche must come to perceive the exterior world as that which she imagines in her head. Thus, objective reality is not an antidote to Blanche’s fantasy world; rather, Blanche adapts the exterior world to fit her delusions. In both the physical and the psychological realms, the boundary between fantasy and reality is permeable. Blanche’s final, deluded happiness suggests that, to some extent, fantasy is a vital force at play in every individual’s experience, despite reality’s inevitable triumph.”

**OVARIAN BREATHING FEMININE ALCHEMY & YOGA FOR WOMEN**  
- with NADIA  
**Saturday, 6 April - from 2.30 to 6.30 pm**  
Our female anatomy (breasts, ovaries, uterus) offers the most energetic potential of the whole mind-body organism. Ovarian breathing helps us connect with this energy, freeing the flow of the body’s fluid systems. This helps not only to prevent and treat disease, but also to live a richer, more ‘fertile’ (meaning ‘creative’) life. Because many of our "blockages" stem from beliefs rooted in our family/cultural conditioning, the process is also oriented to emotional and mental cleansing. The aim is to align mind, emotions and body, allowing us to return to a state of integration and unity with ourselves and our environment.

Please note: Ovarian breathing is not appropriate for women who are pregnant or have certain health issues. Prospective participants are required to complete a medical form which will be provided upon registration.

Somatic Movement Workshop
with Maggie
Saturday 13 - Sunday 14 April (9.30 am - 5.00 pm)
Somatics is a system of slow, mindful movement. It improves the function of the nervous system, creating more ease and freedom within ourselves. Somatics teaches us to recognise and release holding patterns, resulting from pain, injury, stress or habituated posture, and enhances any kind of exercise such as yoga, dance, sport or just moving through life. You will also learn a daily practice in order to maintain better flexibility, coordination, balance and wellness, resulting in a decrease of aches commonly attributed to stress, injury and ageing.

Music Composition “The Ultimate Composer of Sounds”: this is a regular weekly informal meeting to discuss about music composition, and how to develop the necessary skills. We will discuss how to be able to organize sounds, develop and manipulate them in a different fashion, meaningful to performer and/or listener, whatever sound palette or musical style one wishes to use (whether created from scratch or using already existing materials or a combination of both), and how to be able to noteate and/or create it directly on paper or using a music software and/or sound device. Also, very important is how one can open oneself to the “source” and have the complete freedom and skill to materialize “that World” and the subtleties of its vibrations. All this I believe to be the highest achievement of a composer. We will look into conventional and unconventional methods, discovering, experimenting, questioning and understanding the processes by which one can become what I call “Ultimate” composer. If interested, please contact me at: pushkar@auroville.org.in. More info: http://www.pushkarcarlotto.com.

• OUR GRATITUDE (Duration: 35min.)
A Musical offering specially composed for the Centenary of Sri Aurobindo’s and The Mother’s first meeting in 1914 by Shoba Mitra from the Music Section of the Ashram and performed by Ashram students in the Savitri Bhavan Amphitheatre on March 30, 2014.
At the end of the film there is a message from the Mother: “My children, we are united towards the same goal and for the same accomplishment - for a work unique and new, that the Divine Grace has given us to accomplish. I hope that more and more you will understand the exceptional importance of this work and that you will sense in yourselves the sublime joy that the accomplishment will give you. The divine force is with you - feel its presence more and more and be careful not to betray it. Feel, wish, act, that you may be new beings for the realization of a new world and for this my blessings shall always be with you.”
Filmed and edited by Manohar.
